

# Protect the ride you love

We need your help to preserve the rights of trail bike riders and access to areas for riders of registered trail bikes.

## It's FREE for your trailbike club or ride group to join

Our needs as trail riders are rarely considered by those drafting legislation, changing regulations or implementing road safety campaigns. If we don't work to maintain and improve legislation, regulation and campaigns, you will find that united we ride, divided you'll lose access to your favourite riding areas.

Politicians and bureaucrats take notice of organisations that have large membership and wide representation. The more trail riding clubs and ride groups the MCC represents, the more attention trail riders will receive.

### How does the MCC work?

The MCC is run along democratic lines. Member clubs and ride groups raise issues from their own meetings via their delegates. These items are placed on the agenda of the MCC.

### How are issues advanced?

Club representatives work together on developing a solution. Unaligned riders may assist with the process, but member groups are always informed of the progress.
